

IT Sessions on the use of web forum (2006)

The launch of the new website in September 2006 ushered in a new phase of communications for UWAS members. The web forum provided a platform for members to communicate with one another over the internet. The exco forum is for the exco members and the open category is for all other members. Two IT briefing sessions were organised on 12 July and 12 September to familiarise members on the features and use of the web forum. The sessions were held at the NUS and led by Dr Yeo Gee Kin. The web forum has been very successful among exco members with some participation from other members in the open section of the forum. To date (in Dec 2006) about 240 forum postings have been put up. We look forward to more participation from other members.
